

Node-RED Service

Date : 14 November 2022
Team ID : PNT2022TMID14369
Project Name : Industry – specific intelligent management system

Basic knowledge of the following cloud services:

- Node-RED Service

Node-RED Service :

Node-RED is a flow based development tool for visual programming developed originally by IBM for wiring together hardware devices, APIs and online services aspart of the Internet of Things. Node-RED provides web browser based flow editor, which can be used to create JavaScript functions. Elements of applications can be saved or shared for re-use. The runtime is built on Node.js. The flows created in Node-RED are stored using JSON. Since version 0.14, MQTT nodes can make properly configured TLS connection
